API & Server Actions Specification

REST Endpoint API Routes, Server Actions, Payload Schemas, and Errors

SYSTEM

ISCMS (International Student Compliance System)

TARGET INSTITUTION

NFSU Gandhinagar Campus

VERSION & RELEASE

v1.0.0 Production Release

DATE OF ISSUE

August 2026

1. API Architecture

ISCMS utilizes Next.js Server Actions for mutation workflows and API Routes for cron jobs, health endpoints, webhooks, and setup wizards.

2. Key Endpoints

- `POST /api/setup/initial-admin` : Initial setup endpoint for creating first administrator account.
- `GET /api/health` : System liveness and DB connectivity check.
- `GET /api/cron/retention-cleanup` : Automated cron job for purging expired document versions.
- `POST /api/webhooks/meta` : Webhook listener for WhatsApp message delivery status callbacks.
