OFFICIAL SUBMISSION DOCUMENTATION — DOC-NFSU-01

Administrator User Manual

Comprehensive Operational Guide for NFSU System Administrators

SYSTEM

ISCMS (International Student Compliance System)

TARGET INSTITUTION

NFSU Gandhinagar Campus

VERSION & RELEASE

v1.0.0 Production Release

DATE OF ISSUE

August 2026

1. System Overview & Access Control

The International Student Compliance Management System (ISCMS) is designed for National Forensic Sciences University (NFSU) to manage international student passports, visas, eFRRO filings, reminders, and audit compliance.

Security Notice: Administrator privileges grant total system control, including staff user management, document retention policy updates, emergency session termination, and system factory resets.

2. First-Time System Setup & Recovery Mode

When deployed on a fresh database instance, visiting any URL automatically redirects to the </setup> Setup Wizard.

- **Step 1: Admin Account Creation:** Provide Full Name, Official NFSU Email Address, and Password ($\geq$ 8 chars).
- **Step 2: University Profile:** Set University Name ("National Forensic Sciences University"), Timezone ("Asia/Kolkata"), and Academic Year.
- **Step 3: System Preferences:** Configure reminder schedules, session timeouts (30 mins), and document upload size limits (10MB).

3. Dashboard & Health Operations

The Administrator Dashboard displays real-time compliance statistics, expiring passports, pending visa renewals, overdue eFRRO filings, and system infrastructure health metrics.

4. Staff Management & Deletion

Administrators can invite, promote, demote, or delete staff accounts under **Settings** → **User Management**. Account deletion permanently terminates active sessions and writes an immutable entry to [audit_log](#).

5. Factory Reset & Global Sign Out

Accessible under **Settings** → **System**, Factory Reset clears all operational data, students, passports, visas, notifications, and auth users before final university deployment.

Action	Scope	Impact
Global Sign Out	Current Admin Sessions	Signs out of all active devices
Emergency Logout	All System Users	Terminates all active sessions for all users
Factory Reset	Full System	Wipes data and restores Setup Wizard state
